SOLUTION INFORMATION

Inception Date:	14 October 1999
Assets under management:	R32.6 bn
Target:	CPI + 6% p.a.
Regulation 28 compliant:	Yes

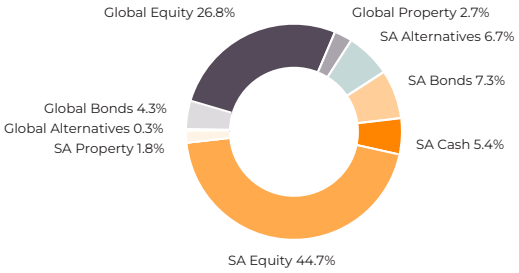

INVESTMENT DESCRIPTION AND OBJECTIVE

The solution aims to achieve maximum long-term growth in excess of inflation and targets returns of 5% to 7% above CPI per year (after fees) over rolling seven-year periods. It invests across asset classes, locally and globally, including listed shares, listed property, bonds and cash. Alternative assets, like hedge funds and unlisted assets, may also be included. Symmetry is responsible for asset allocation and allocates to specialist active asset managers and index-tracking mandates in each of the asset classes. The solution is suitable for investors with a long-term horizon who are comfortable with some volatility in returns as it has high exposure to growth assets (equities and property) and low exposure to defensive assets (bonds and cash). The solution is offered through a life policy.

Symmetry is a division of Old Mutual Life Assurance Company (South Africa) Limited, a licensed Financial Services Provider and Life Insurer. Investors' rights and obligations are set out in the relevant contracts. Market fluctuations and changes in rates of exchange or taxation may have an effect on the value, price or income of investments. Since the performance of financial markets fluctuates, an investor may not get back the full amount invested. Past performance is not necessarily a guide to future investment performance. Guarantees on returns and against capital losses are not provided. All returns are rand returns unless otherwise stated. Whilst every care has been taken in compiling the information in this document, the information is not advice. Symmetry compliant presentations and a list of composite descriptions as well as policies for valuing portfolios, calculating performance and preparing compliant presentations are all available upon request.
